# HANDWRITING TEST

**Write the given write up in your good handwriting in the space provided below**

Water is one of the nature's precious gifts to mankind. All living things consist mostly of water. It is the most essential component of life and is vital for sustenance. The importance of water in our diet is apparent as it helps the body to maintain its temperature. There is no doubt that water is everywhere and it is very important to our Earth and the life inhabiting it. Water contains no calories and is a significant factor in losing weight. It is the key component in determining the quality of our lives and is a universal solvent. We should save and conserve water for our future use.

## HANDWRITING TEST

**Write the given paragraph in your good handwriting in the space provided to you**

Good Health is important because a man of health can enjoy great happiness during his life time. Without health we cannot do anything in this world. A man suffering from fever remains confined to bed. He cannot get out of doors. He cannot do anything for anybody. Health is more valuable than wealth. Even a poor peasant with good health is happier than the rich person with poor health. A sound mind lives in a sound body. Health is essential for all our activities of life whatever we may be – a doctor, a leader, an artist, we must possess health by all means.
